RE: MARIGOLD ROAD IMPROVEMENTS

Dear Residents:

Thank you all for your patience and support during the reconstruction of Marigold Road. We have come to our final phase of the project, which is the asphalt paving. The paving operation will be divided into two halves: north side and south side. In order to complete the paving, we are required to remove the stone ramps to your driveway for final grading of the road, followed by paving. This will be a two day, two-step process.

This phase requires that you do NOT park your car in your driveway OR the roadway during the two days of grading and paving. You will have access to your driveway at the end of the second day when the paving operations are completed on your portion of the road. It is recommended that you park on adjacent streets during the two day period. Any vehicles left in your driveway must remain there for the two day work period.

We have tentatively set the date of Monday, October 1 to begin the grading and removal of the ramps on the SOUTH half of Marigold. The north half should follow a few days later. This scheduling, of course, is contingent upon the weather. As the date draws closer, you will receive a second letter informing you of the exact date that you will need to have your car out of the driveway for ramp removal, grading and paving.

We thank you for your cooperation and continued patience as we close out this project. If you have any questions or concerns, please do not hesitate to contact Leong Tan at JTO, Inc. (440) 352-1900 or Allen Pennington, City of Mentor (440) 974-5786.

Sincerely,

David A. Swiger, P.E.
Mentor City Engineer

Allen E. Pennington, P.E.
Civil Engineer – Traffic
