8095 Mentor Ave., Mentor, OH 44060

Situated on nearly 8 acres along Mentor Ave., James A. Garfield National Historic Site honors the 20th President of the United States and Mentor resident James A. Garfield at this Historic Site found in the heart of our community.

James A. Garfield lived in this home from 1876-1881 and it was here that the front porch campaign was originated in 1880 as almost 17,000 supporters from across the nation descended on "Lawnfield". After his assassination, his family continued to reside here, and the home was occupied until 1934. The President's widow, Lucretia, added the nation's first presidential library to the house in 1885-86.

National Park Service Rangers and volunteers provide guided tours of the Garfield House, which has been restored to its appearance of the era of 1886-1910.

The Garfield Home boasts a collection of artifacts that are over 80% original to the Garfield Family.

An on-site Visitor Center is home to various displays highlighting key aspects in the life and times of James A. Garfield and the Garfield Family. Visitors can also view a biographical film about James A. Garfield in the theater located inside Visitor Center.

There is no charge to view the exhibits or the film in the Visitor Center, or to take a guided tour of the Garfield House. Reservations are only required for groups of six or more; please call (440) 255-8722 for a reservation if bringing a group of six or more.

# Mentor Marsh...for the Birds

One of the premier birding sites in Northeast Ohio, Mentor's 230-acre nature preserve includes 1.5 miles of shoreline with rare dune plants, a riverine marsh, and mature oak bluff. It is located on the western boundary of the over 800-acre Mentor Marsh State Nature Preserve, which is also one of the best birding sites in the state. Mentor Marsh contains diverse wetland communities and habitat types that serve as important breeding and nursery areas for fish and waterfowl, as well as a 'stopover' resting site for neo-tropical birds and butterflies as they migrate up to several thousand miles in the spring and fall.

Over 260 bird species have been recorded within or offshore of the Mentor Lagoons Nature Preserve and Mentor Marsh. The large-scale removal of invasive phragmites, led by the Cleveland Museum of Natural History, has increased occurrences of highly sought-after marsh birds. The potential for rare bird sightings and new breeding species continues to increase. All of these factors, as well as the abundance of protected species like the once rare Bald Eagle, have helped designate the Marsh as an Important Bird Area (IBA) within the Grand River-Lower Watershed.

Along the east portion and south side of the Preserve, you can overlook the marsh and several mudflats, which are excellent spots for shorebirds and waterfowl in migration. The Overlook Trail begins by cutting through deciduous forest, full of warblers, vireos, and flycatchers from spring to fall, and hosts a diversity

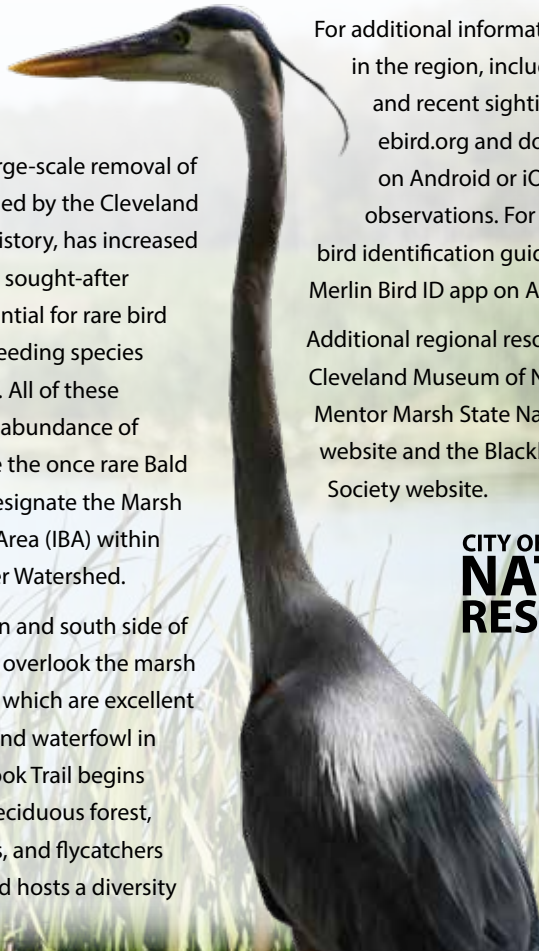

of species year-round. The trail continues to the bluffs, which offer excellent scoping opportunities for mergansers, gulls, scoters, and many species that overwinter on Lake Erie. Trail maps can be found at the Lagoons office or kiosk.

The City of Mentor Natural Resources Division aims to continue monitoring the quality and diversity of species in the Mentor Lagoons and Marsh to help guide natural resource management. This comprehensive checklist provides abundance ratings by season for all species observed within the Mentor Marsh region. These ratings are site-specific and are derived from eBird data and local birders.

For additional information on birding in the region, including hotspots and recent sightings visit [www.ebird.org](http://www.ebird.org) and download the app on Android or iOS to record your observations.
